Professional Summary

Results-driven MERN Stack Developer and problem solver with hands-on experience in building scalable enterprise web applications and AI-integrated architectures. Adept at leveraging advanced Data Structures and Algorithms (DSA) to optimize system compute cycles. Proven track record of accelerating application delivery speed, reducing endpoint latency, and unlocking significant revenue for global clients.

Technical Skills

Languages: JavaScript (ES6+), C++, SQL, HTML5, CSS3

Frontend Development: React.js, Redux Toolkit, Next.js (Basics), Tailwind CSS, Responsive Design

Backend & Databases: Node.js, Express.js, MongoDB, MySQL, RESTful APIs, OOPs Design Principles

Tools & Cloud Platforms: Git, GitHub, Postman, Vercel, Netlify, AWS (Basics), Linux/Bash, JWT Security

Work Experience

Software Development Intern

Jan 2026 – Apr 2026

Telecommunications Consultants India Limited (TCIL)

Delhi, India

- Engineered 12+ modular frontend components using React.js and scaled robust backend routing modules via Node.js/Express.js.
- Optimized legacy RESTful APIs, successfully reducing average client-server data request latency by 15%.
- Designed relational and non-relational database schemas, utilizing DSA concepts to improve data indexing efficiency by 20%.
- Debugged 30+ production-critical issues, verified API endpoints via Postman, and managed collaborative version control with Git.

Freelance Full Stack Developer

Jan 2025 – Jan 2026

Self-Employed

Delhi, India

- Programmed and delivered 3+ production-grade MERN applications, scaling performance to handle concurrent real-world transactions.
- Integrated robust JWT-based role authentication architectures and automated payment gateways to ensure 99.9% secure user checkouts.
- Established streamlined CI/CD auto-deployment workflows using Vercel and Netlify, cutting application release time by 40%.

Projects

LifeSpark Associates – AI Powered Web Application

Jan 2025

Client Project

Remote

- Architected an LLM-integrated application using React, provisioning context-aware AI outputs under 200ms latency.
- Orchestrated high-availability backend microservices, enabling the business to generate over **Rs. 5,00,000 in revenue** inside the initial 30 days.

Cyber Shop – E-Commerce Platform

Jan 2025

Personal Project

Remote

- Built an e-commerce infrastructure incorporating custom database indexing, dynamic shopping cart logic, and strict JWT protected api scopes.

Achievements & Coding Profiles

- LeetCode:** Solved **200+** advanced algorithmic questions (Arrays, Strings, Dynamic Programming) with an active consistency streak.
- HackerRank:** Earned a **5-Star Gold Badge** in Problem Solving / C++ and verified core competency via the Basic SQL Assessment.
- Academic Excellence:** Secured a top-5 percentile academic ranking during the Bachelor of Computer Applications (BCA) course.

Education

Master of Computer Applications (MCA)

Jan 2026 – Jan 2028

Delhi, India

Status: First Year

Bachelor of Computer Applications (BCA)

Jan 2023 – Jan 2026

Varanasi, India
